

Product Roadmap

UPDATED: November 22 2018

LAUNCHED

NEXT 3 MONTHS

Data and IP

Simplicity

Initiatives to aid simplicity, self serve, rationalisation and efficiency

Improvements

Investing in our core products

New

Products offering growth opportunities for your business, new products and services

- Address Search API
- Wideband Feasibility API now includes Region, Area, Zone, State and ESA information along with Equipment installed indicator for the Wholesale Business internet Product for a given Address ID
- POP Lookup API – The Point of Presence (POP) Lookup API retrieves a list of all the Head-Ends and their respective details. The API lists Head-End information of Ethernet Access, Ethernet Backhaul and Managed Leased Line products
- Quote API (Price Check) for EA. The Price Check feature provides installation and recurring schedule rates for the Ethernet Access (EA) product
- Q2A ordering tool
- Telstra Wholesale Internet (TWI) Enhancements
- OTN Wavelength Interface

- Ethernet Access using nbn™ access
- Business Voice IP Controlled Launch
- Wholesale Business Internet (WBI)
- My Network Diagnostics tool

- Single Monthly Rental Charge (MRC) and less route types

- Quote API (SEP) for EA
- Order API for Ethernet Access (EA)
- Simplified pricing structure
- Sub 100G Managed Lease Line (MLL)
- Wholesale Business Internet (WBI) Standard access type launch
- Business Voice IP enhancement: Voice Only Resale (VOR) launch
- New Data Centre Interconnect locations

- Beta release of TW Hub, to quote and order DCI services and submit a billing enquiry. Includes check service availability, receive quote, place order, receive/sign contract for DCI and ability to submit a billing enquiry [includes username and password access to Hub]

Broadband and our nbn™ solution

Simplicity

Initiatives to aid simplicity, self serve, rationalisation and efficiency

Improvements

Investing in our core products

New

Products offering growth opportunities for your business, new products and services

- Service Qualification API
- Address Search API

- Ongoing investment: Network investment programme (capacity and port augmentation)

- Broadband and Voice delivered over nbn Multi Technology Mix (MTM):
- Fibre to the Curb (FTTC) access technology
- Diagnostics API extended to include FTTC: It extends the current Loopback and Network Performance tests and provides two new tests – DPU Status & DPU Port Status. The new tests gives a snapshot of the current state of the DPU device and port

- Broadband Busy Hour Speed Reporting (on TW supplied HNGs only)

- Market Extender Suite (ME) a white-label, telco solutions for mobiles and nbn
- SIP Call Termination Service (CTS) launch
