

List of Equivalent Services Under Telstra's SSU

List of Equivalent Services

This list of Equivalent Services sets out the Regulated Service and the corresponding Equivalent Service(s) as required under Clause 9A of the SSU.

New or amended services

We will update this list if an eligible service becomes an active declared service (*new declared service*) or the ACCC amends the service description of an active declared service with the effect of increasing the scope of services that fall within the service description of that declared service (*amended declared service*). Within 90 days of such events, we will update this List of Equivalent Services to identify the Equivalent Service for the new declared service or the amended declared service.

List of Equivalent Service as at 7 May 2012

Regulated Service	Equivalent Service(s)
Wholesale Line Rental	Retail Line Rental
Domestic PSTN Originating Access Service	The local exchange access component of the Basic Telephone Service
Domestic PSTN Terminating Access Service	The local exchange access component of the Basic Telephone Service
Local Carriage Service	The local calls component of the Basic Telephone Service
Domestic Transmission Capacity Service	<p>The carriage of communications between one point and another point on Telstra's network via symmetric network interfaces on a permanent uncontended basis in connection with the supply of retail services.</p> <p>The Equivalent Service will vary depending on the category of wholesale service being supplied in fulfilment of the DTCS service declaration. As a consequence, for this purpose the Equivalent Service for each such category of wholesale service:</p>

	<ul style="list-style-type: none"> • will be the basic carriage component of the Telstra service that: <ul style="list-style-type: none"> – is the same kind of service as that category of wholesale service; – uses the same network interface as that category of wholesale service; and – has the same speed (or the closest lower speed) as that category of wholesale service; • but, for the avoidance of doubt, excludes any part of that service which comprises: <ul style="list-style-type: none"> – any redundancy or route diversity features or functions; – management services associated with that service; or – any features or functions of that service which are an overlay to the basic carriage component of the Telstra service.
Line Sharing Service	The Layer 2 component of Telstra's Retail ADSL Service
Wholesale ADSL Layer 2 Service	The Layer 2 component of Telstra's Retail ADSL Service
ULLS	<p>The continuous metallic twisted pair component of the following services between a Telstra local exchange MDF and the network boundary point at an end user premises:</p> <ul style="list-style-type: none"> • Retail Line Rental; • the Layer 2 component of Telstra's Retail ADSL Service.
TEBA	The use of an Exchange Building Facility (or any External Interconnect Facility associated with that Exchange Building Facility) in connection with the supply of Equivalent Services ¹ .

¹ This does not prevent or restrict Telstra from planning and managing capacity in its Exchange Building Facilities or External Interconnect Facilities in a manner that provides for dedicated areas to be allocated within an Exchange Building Facility or External Interconnect Facility (or any part of it) for use by TEBA customers separate from those areas allocated for use for other purposes, including in connection with the supply of Equivalent Services.
