TELSTRA EQUIPMENT BUILDING ACCESS (TEBA)

CAPPED SITES

CAPPED SITES FOR TELSTRA EQUIPMENT BUILDING ACCESS

The following list of TEBA sites shows the sites that have been capped and currently have no floor space and/or MDF space available for standard TEBA installations.

This is a dynamic list which is updated approximately monthly. Sites currently listed below may be removed from the list if space becomes available in the future (for example, because of completion of capital works or changes in requirements).

While there may be inadequate capacity in a site for access based on existing TEBA product specifications and technical standards, access may be possible under future changes to those specifications and standards or through non-standard solutions at the customer’s option and cost. Customers are encouraged to contact Telstra if they wish to conduct a feasibility study into a non-standard access solution.

Subject to the above:

“Racks & MDF capped” means that there is neither rack space nor space available on the main distribution frame.

“Racks Capped” means that there is still space available on the MDF, and customers may be able to house their DSLAMs external to the Telstra exchange and apply for an External Interconnection Cable to connect to the exchange MDF.

“Potential” means room may be available after a full consultation with the Area Planner to determine the scope of works required to establish the TEBA area. Scope of works for “Potential” sites may include, but is not limited to, works such as converting non-equipment rooms into Equipment rooms, removing decommissioned equipment or upgrading major building facilities (e.g. AC switchboards, EPP, and central air conditioning plant.). The amount of space able to be made available by undertaking such works may be limited. Customers wishing to assess these sites should submit a PSR.

As at: 7th March 2016

TEBA SITE	EXCHANGE CODE	STATE	TEBA SPACE STATUS
BERWICK SOUTH	BWKS	VIC	Potential
BROOKFIELD	BKID	QLD	Potential
EPSOM	EPSO	VIC	Potential
GARDENVALE	GALE	VIC	Potential
GLEN FORREST	GFOR	WA	Potential

GREENWITH	GWTH	SA	Potential
HOPE ISLAND	HOID	QLD	Potential
