DSL TRANSFER AND DSL/SSS TRANSFER PROCESS PARTICIPANTS

TELSTRA WHOLESAL.COM.AU

The DSL transfer process provides an efficient one step mechanism for moving DSL end-users/customers between DSL service providers. The DSL transfer process can only be used to transfer DSL services between service providers that provide DSL services over Telstra's DSL network and participate in the DSL transfer process.

Transfers of DSL services between Telstra's DSL network and other networks can only be performed using the disconnection/reconnection process or between service providers who participate in the DSL/SSS Transfer Process.

End-users/customers should check with their current DSL service provider if they have queries about whether their DSL service can be transferred using the DSL transfer process or the DSL/SSS Transfer Process.

As of **15 August 2016** the following service providers had signed up to the DSL Transfer Process or the DSL/SSS Transfer Process:

Service Provider Name	DSL Transfer	DSL/SSS Transfer
