

TELSTRA WHOLESALE BROADBAND AGGREGATION

A simple, cost-effective way to reach ADSL users across Australia and grow your broadband footprint.

As a Telstra Wholesale DSL Layer 2 customer you can benefit from our Ethernet-based national Broadband Aggregation solution, a simple, flexible and cost-effective way to reach ADSL users across Australia and simplify your DSL and NBN Broadband operations, wherever you're located.

Overview

Our Broadband Aggregation solution enables you to aggregate your DSL and NBN end user traffic over a single physical access at a single location, known as Point of Presence (PoP) in your state of choice or to several state-based PoPs, depending on your needs. Our solution uses our Broadband on the NBN aggregation platform to deliver a consistent aggregation solution for services via DSL and NBN networks, making the transition to the NBN easier.

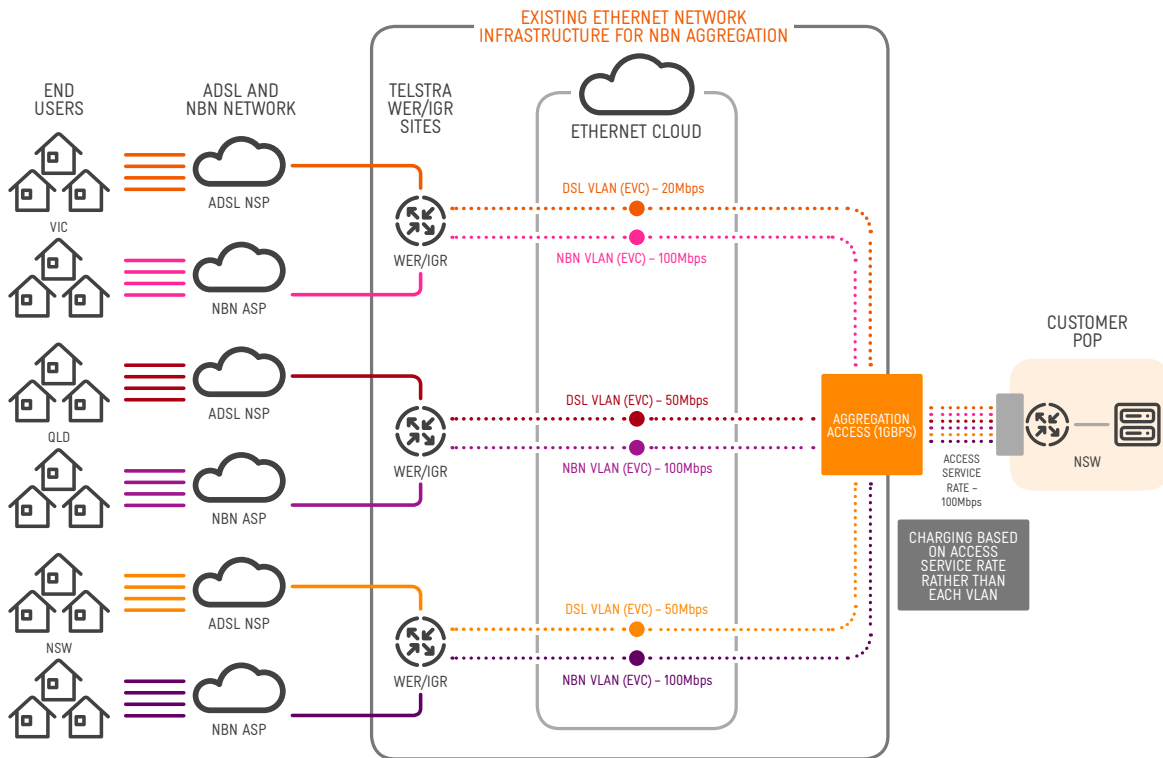

And because it's Ethernet-based with scalable bandwidth and capability above 1Gbps, you can rest assured you'll be able to continue to meet the growing data needs of your end users.

Simple, flexible and cost-effective ordering and billing

Pay for a single Access Service Rate (Mbps) with a monthly charge for both ADSL and NBN traffic, rather than per VLAN.

Using our online ordering system, LinxOnline Ordering™ (LOLO), you choose the capacity (Access Service Rate) you need to meet end user demand and only pay for that capacity. And because the Aggregation Access covers both ADSL and NBN services, purchased capacity can be used across both services. We make payment easy with one monthly charge for both ADSL and NBN traffic.

TELSTRA WHOLESALE BROADBAND AGGREGATION SOLUTION

What you can expect when you choose Telstra Wholesale broadband solutions

We understand you want confidence and certainty when you're transitioning to a new platform or employing a new solution.

Our network

We're in the places you need us to be. We offer you broadband coverage across Australia over copper and NBN fibre and fixed wireless networks.

Our experienced people

Telstra Wholesale offers an experienced and skilled team of dedicated DSL and NBN specialists to help identify the broadband solution that best suits your needs. You'll also receive ongoing technical and operational support during and following the service delivery. We pride ourselves on the consistency, service assurance and operational support we offer you.

Our systems and B2B support

Our proven, integrated systems capabilities and B2B support help you manage your business needs with a range of online tools for ordering and technical support.

Getting connected

To connect to our Broadband Aggregation solution, you'll need to have a Broadband Aggregation Access connection to carry traffic between Telstra's network and your PoP.

telstrawholesale.com.au

The spectrum device and ™ are trade marks and ® are registered trade marks of Telstra Corporation Limited, ABN 33 051 775 556.

Once you have a Broadband Aggregation Access organised, you can order your DSL and/or Broadband on NBN VLANs and end user services through LOLO or our business to business system LinxOnline Interactive Gateway™ (LOLIG). If you don't have access to LOLO, ask your Account Manager to get you set up.

You'll find indicative lead times and activation processes in our Ordering and Provisioning Manual (OPM). Assurance processes and technical details are covered in our Operations and Maintenance Manual (OMM) and Technical Service Interface Specification (TSIS) respectively. These documents are available on the Telstra Wholesale Customer Portal (TWCP) or from your Service Manager.

An onboarding guide will provide you with all the information you need to get started with Broadband Aggregation.

More information

If you're already a Telstra Wholesale customer, contact your Account Manager for more information.
